

An ultra lightweight ramp, the ideal solution for loading scooters and electric wheelchairs into vehicles. Comprising two sections which fit together lengthwise, each ramp is hinged across its mid-section and can be folded to half its length and carried like a suitcase when not in use. The Scooter ramps are easy to position, handle and transport . They have a unique slip-resistant surface and a quality paint finish. Available in standard lengths between 1680mm to 2135mm. Alternatively we can manufacture to your specific requirements

The Scooter Ramp takes away the need to lift or dismantle heavy wheelchairs or scooters. Perfect for both 3 and 4-wheeled machines. Giving a safe passage for both the machine and user

...providing **access** where you need it
