LEADING ACCESS  
SOLUTIONS

PORTARAMP.CO.UK

## Portaramp Aftercare

DESIGN • BUILD • DISTRIBUTE • INSTALL • TRAINING • **MAINTENANCE** • ASSET MANAGEMENT

## Who are Portaramp?

We at Portaramp are recognised throughout the UK and Europe as a market leader for access ramp solutions in the Rail Industry. We supply direct to all the UK train operating companies, plus many train builders and operators within Europe.

We offer an end-to-end holistic solution to our customers, from design, build and distribution, to training, installation, maintenance and asset management; providing total peace of mind for both train operators and their commuting customers.

Our access ramps have been certified to the European Standard 2008/164/EC Technical Specification relating to Persons of Reduced Mobility (PRM-TSI). To maintain these standards, annual inspections are recommended for which our Aftercare Service is unrivalled.

## Why our Aftercare Service?

Unlike Facilities Management companies, we have unrivalled knowledge and experience in the manufacturing, inspection and maintenance of our portable, safe access ramps and equipment; we built them so we know what excellent looks like.

Not only do we inspect and maintain our ramps and access equipment, our Aftercare Service also offers an asset management solution. We record the numbers of ramps in service throughout the UK and Europe, the locations of all units and the due dates for their inspection, relieving operators of this arduous task and allowing them to focus on their commuting customers; we do it all.

For more information about our Aftercare Service, please call today on **01953 681799** or email [sales@portaramp.co.uk](mailto:sales@portaramp.co.uk)

## The Benefits

- Prolong the life of your equipment
- Security of continued safe access service with zero delays
- Maintained compliance to Standard 2008/164/EC
- Thorough examination of each component for any signs of wear and tear
- Written inspection report and certificate of inspection
- Inspection tag showing equipment is safe to use and next inspection due date
- Repair schedule where necessary
